WIR BIETEN TECHNIK

Neckarsulm Oktober 2022

Dear customers of Kohler GmbH,

Thank you for your enquiry regarding the topic of energy supply.

Kohler is a medium-sized trading company with well-known suppliers. We have been certified by TÜV Süd for over 10 years in the areas of quality (economy), environment (ecology) and occupational health and safety (social aspects). (Certificate see under our website: <https://kohler.de/zertifikate/>)

The topic of energy supply plays a central role for Kohler. On the one hand, to influence and shape ecological and social aspects as positively as possible, and on the other hand, to remain competitive in the long term.

As we are not a manufacturer in the true sense of the word, we are only affected to a small extent by the current and future gas supply situation.

I hope that this has answered your questions regarding gas supply satisfactorily.

Of course, we will be happy to answer any questions you may have.

Head of Supply Chain Management

i.V. Thomas Pasquale Barbara
